3. Research on the behavior of user's requirement and application
4. The core value and its implementation of Digital Library
5. The cooperation between China and US on knowledge management and service in digital time

Conference Background

In 1996, the 1st China-US Library Conference was held in Beijing as the pre-conference before IFLA. 5 years later, the 2nd Conference was open in Flushing Branch Library of Queen Public Library in N.Y. The US party hoped to shorten the time difference of five years for holding the conference on the closing dinner, and suggested to hold the 3rd China-US Library Conference in Shanghai. During the period of 2002 IFLA conference, both Chinese and US parties discussed the details for arranging the 3rd China-US Library Conference. According to the primary discussion, the conference would be held around 2005 Mar. with no more than 90 people among which 30 representatives from US and 50-60 from China.
